

Brew Cloud Privacy Policy

Privacy Policy

Our privacy policy is not to sell or share your email address, password or IP address with third parties except for official legal request (such as a legal warrant or subpoena from a judge).

If you sign up for our email list when registering you will be added to the Brew Cloud email list only. You may receive email notifications for various events and news from the Brew Cloud app/site, Brew Cloud Email List, theBrewCloud.com site.

While we never share your email, password or private information, we do occasionally send promotional emails including paid ads and new Brew Cloud product announcements as part of the Brew Cloud newsletter.

For the Brew Cloud Recipe app/site, all recipes you mark as public will be publicly available to anyone. Any data you enter in your user profile (except email address and password) such as your name, avatar, etc....will be shown in your public profile. Your posts, comments, reviews, etc. will also be publicly viewable by anyone.

Large portions of the content on the Brew Cloud web sites are user-contributed, and the owners of the site make no attempt to moderate or filter every posting. If you find a post, comment, or other content that is offensive or inappropriate, please report it to a moderator for review. There are “report to moderator” buttons throughout the website.

We do reserve the unilateral right to ban users, remove accounts or remove content that is found to be offensive, inappropriate, or in violation of the user agreement. In extreme cases, your user account may be removed along with all of your content.

If you would like to remove your account you can contact us on the support page and we will take steps to remove your account and data from our sites.

Security

Brew Cloud's (web or mobile app) connections to the recipe server at <https://theBrewCloud.com> is secured using SSL/TLS 1.2 so your data is encrypted from end-to-end when moving recipe data, passwords and other items to the cloud.

We only store encrypted versions of your password on our sites and never store the unencrypted passwords, and we do take reasonable steps to prevent unauthorized access, and do our best to protect your privacy within the limitations of an open conventional web site.

The Bottom Line

The bottom line: we do take reasonable steps to protect your data and privacy within the limits of normal encrypted servers, and will not intentionally share your data with anyone (except authorized law personnel with a legal warrant) without your permission.
